

# M2Desk Flex

With the M2Desk Flex unit, we offer a new product which is not only ergonomically sound, ultra energy sufficient and which can be mounted at any frame. Besides these particular features, the M2Desk Flex unit is above all a build-in unit which can be assembled into any existing or new table top.

## M2Desk Flex:

- Can be integrated in any table top
- Can be built in any existing and new furniture
- Can be delivered in any RAL color
- Can be produced from high quality materials, such as stainless steel (design version)
- Can be delivered with PoE (Power over Ethernet) is optional, (Single Cable Concept)

The M2Desk unit is only 4.6 cm high, has a full-function PC, a high resolution touchscreen, doesn't produce any noise and heat and uses only 11 watts of energy.

## Unique suspension system

Through a self developed and unique suspension system, the M2Desk unit has no loose parts. After placing the M2Desk Flex into the table top, you just turn the 4 Allen keys on the bottom of the unit and in no time the unit is fastened. After turning the Allen keys, you'll see a 'screw arm' is coming out of the unit and will be moving towards the table top. Now the M2Desk Flex unit will be locked! When you release the M2Desk Flex unit, the 'screw arms' will turn automatically into the unit again.
